

Gmail account pricing between vendors and forwarding steps.

?? Updated March 2026

Account type requirement: Accounts MUST include a recovery email. Basic accounts without recovery email require ~1hr/10 accounts of extra manual work to add one. Buy accounts with recovery email pre-included (e.g. AccsMarket "With Additional Email" tier).

Estimated actual cost per successfully processed account (as of Feb-Mar 2026):
~\$1.11-\$1.44 (includes account cost + failed/replaced account overhead).

Original Content (2023)

Based on what we have going with the current vendor right now. \$80/200 Gmail accounts is \$0.4/account.

If we are looking for a cheaper (extra Gmail adder PH worker) option maybe we could declare \$0.2/account. And only pay per account.

Creation of accounts/hr.*\$0.2 = \$2/hr.

However, this is just a rough estimate since per experience 5SIM sometimes gives non-working numbers and sometimes generates the number for several minutes.

For the existing vendor websites checked in the past, see the table above for updated prices.

The cheapest is AccsMarket, where you can get Gmail accounts for as low as \$0.01 per account (basic, no recovery email). However, some of these accounts are not verified by phone and may have security issues. **Recovery email accounts are now required — do not buy basic tier.**
